Setting Up Scene Builder in Eclipse IDE

1. Download JavaFX Scene Builder from:
   http://www.oracle.com/technetwork/java/javafxscenebuilder-1x-archive-2199384.html
2. Change the path to Scene Builder in Eclipse to installation location, by selecting windows->preferences->JavaFX tab. If you install JavaFX Scene Builder on a 64-bit Windows machine, the default installation location is C:\Program Files (x86)\Oracle\JavaFX Scene Builder (version)
